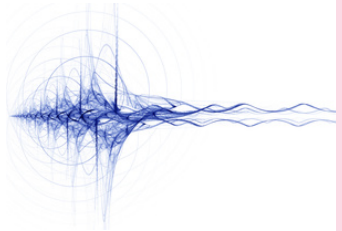
RelaxoCat©

The all-in-one solution for deep relaxation



RelaxoCat® is world first in the range of deep relaxation for cats and were developed in collaboration with veterinarians and behavior therapist.
It is aligned especially for the sensible and high-frequency sense of hearing of cats.

RelaxoCat© works full-automatically, effective and independent of the age of the cat. It can be used in- and outdoor and is an ideal travelling compainon. We guarantee it has no harmful side effect.

RelaxoCat© consist of an audible wave of sound and 6 (six) further subliminal sound which lead the cat to a deep relaxation. These 6 (six) subliminal sound are for the human sense of hearing not concious perceptible.

The audible wave of sound can be switch off so RelaxoCat© only work with the unhearable subliminal sound.
The unhearable subliminal sound are always on, if the sound module works.

RelaxoCat© has an inbuilt battery and works without plug. The total working time with the power bank is more than 36 hours.

Charging RelaxoCat©

RelaxoCat© has an inbuilt rechargeable battery which work for approximately 8 hours (depending on the volume).

If the working power is lower than 15%, the blue working LED will start to flash and the sound module should be recharged.

Keep the power kit charged so it can be used in case the sound module has low power.

Please use the attached cable and AC power supply for recharging the device.

Battery power RelaxoCat© approximately 8 hours Battery power of the power kit approximately 28 hours (depending on the volume)

Fixure RelaxoCat© on the pet carrier during the transport

Please use the attached fixure to fasten the RelaxoCat© case on the pet carrier.

Make sure that the sound module is full charged before your journey, respectively use the power kit. Choose a comfortable volume. The Sound module can be used during the journey in the unhearable modus.

Please fasten the RelaxoCat© case on the exterior part of the pet carrier and use the attached fixure to fasten it on the pet carrier. Put the fixure around the RelaxoCat© case and through the handle to prevent the RelaxoCat© case will open during the journey.

Application RelaxoCat©

German Innovation

Many cat owners are familiar with the problem that their cat are overwhelmed in stressfull situations which leads to unwanted behaviors (for example: in the car, alone at home, visiting the vetenerian, fireworks, etc.)

Bye bye stressors

RelaxoCat© helps successfully to prevent this stressors, does not matter at home or in strange environment, because RelaxoCat© works everywhere.

Adjusted sound version

The RelaxoCat© sound module works with a specific sound version which is adjusted to the sensible sense of hearing of the cat. It will deeply relax the cat. The user can decide, if the RelaxoCat© sound module plays additionally the audible relaxing music or not. Just press the "M" button to switch for audible or inaudible sound. The unhearable subliminal sound is always playing.

Stressfull situations during thunderstroms, strange environment, fireworks etc. are solved now!

Step 1
Start of the acoustic irradiation

This instruction support you to use RelaxoCat© effective.

RelaxoCat© works full automatically so it is important that you behave calm during your usages.

Please do never start the acoustic irradiation in combination with an immediate occurence (see examples of usage on page 9; exceptions: thunderstorm and fireworks) to prevent an respondent conditioning of your cat and perhaps intensify current problems.

The position

Put the RelaxoCat© in an radius of approximately 5 meter near the cats main position and pay attention that RelaxoCat© is unreachable for the cat.

The first use

Please use RelaxoCat© at the minimum of the first 10 days in combination with the audible sound track only and never in your absence.

Choose a comfortable volume which invite you to relax.

Within this time do not give him any commandos or correct his behavior. Keep being normal.

Please use the acoustic irradiation daily for 2–3 hours at the beginning.

After several days you will notice your cat will be much relaxed than before and we can go further with the next steps.

Step 2
Further acoustic irradiation

Now you can start to shut off the for human audible sound through the selection switch.

Please pay attention to change sometimes the audible and inaudible wave of sound to prevent an unwanted respondent conditioning.

Always start the acoustic irradiation during the period of rest of your cat!

You can start the acoustic irradiation during your short absence after approximately 2 weeks.

However, please start with the acoustic irradiation at least 1 hour before you plan to leave.

Increase your period of absence and combine longer and shorter loneliness of your cat.

After 3 weeks you can be absence for longer time during the acoustic irradiation.

Acoustic irradiation time
Problem-oriented until 8 hours per daily usage.

Please pay attention that RelaxoCat© has a central focus in this case.

A permanent acoustic irradiation can also be used during an event as thunderstorm, fireworks and travelling.
